How to make manga art with the AI manga generator

Three steps to manga art with the AI manga generator, from a blank prompt to an inked illustration.

1

Describe your panel

Write the character, the scene, and the genre — for example, a scarred swordsman in a rain-soaked duel, or a shy girl under cherry blossoms. The more specific the prompt, the closer the manga art comes to your story.

2

Pick a model and generate

Choose GPT Image 2 or Nano Banana 2 in the AI manga generator, then generate. Each generation spends credits, so you sign in first and every run stays intentional.

3

Refine the ink

Adjust the pose, the mood, or the screentone in your prompt and generate again until the panel reads the way your story needs.
